# **DISTRICT DISASTER MANAGEMENT PLAN 2015-16**

## **1. INTRODUCTION:**

### **1.1 WHY IS IT:**

Vulnerability of the Boudh District towards disasters, both natural and man-made, is widely recognized. Boudh is vulnerable towards natural disasters like; floods, cyclones, droughts, earthquakes, sunstroke, fire accidents and the like. Losses caused by disasters continue to mount year after year. The need for an effective disaster management strategy to lessen disaster impact is increasingly being felt in many quarters and also for strengthening of organizational structure for disaster management. Along with, regular updating of Codes/Manual/Disaster Plans on the basis of experience gained and technological developments should be done.

It was felt that the generic categorization of disasters would help in preparing disaster management plans. This generic categorization of disasters is in no way intended to disturb handling of specific disasters by various departments.

Precise actions, procedures and responsibilities have to be laid down well in advance in order to ensure timely response in case of any disaster. Therefore, a mechanism that takes into account multiple hazards and basic preparedness has to be articulated in the form of Quick Response Teams, Quick Assessment Teams, Reporting Procedures, Checklist and Handbooks. The mechanism also lays down crucial parameters, requirements and organizational composition of Emergency Operations Centers and Incident Command Systems.

### **1.2 OBJECTIVE:**

The objective of the plan is to identify all common elements of response. This act as a base plan or a generic / modular plan for all response activities. It provides a frame work around which other agencies and departments can outline their own activities for disaster response. This plan will then be supplemented with specific disaster plan to take into account the peculiar conditions that might arise due to the specific disaster. However, these specific plans will have to be dealt with, in detail, in order to provide an account for all disasters in Boudh.

The District Disaster Management Plan (DDMP) has been envisaged as a preparedness plan whereby the receipt of a signal of an impending disaster would simultaneously energize and activate the mechanism for response and mitigation without loss of crucial time. This would entail all the participating managers to know in advance, the task assigned to them and the manner of response. Identification of available resources including man power, material, equipment and adequate delegation of financial and administrative powers are prerequisites to successful operation of the DDMP.

The DDMP is in essence, the Standard Operating Procedure (SOP) in which the implementation of efforts on ground is well laid down. Activities such as evacuation, search and rescue, temporary shelter, food, drinking water, clothing, health and sanitation. Communications accessibility and public information, that are important components of disaster management, would follow on the activation of the DDMP. These activities are common to all types of disasters and require subdivision and preparation of sub action plans by each specified authorities. Each sub group has been requested to work out the DDMP mechanism relevant to their group of disasters.

**The DDMP requires the disaster managers to:**

- ❑ Evolve an effective signal/warning mechanism
- ❑ Identify activities and their levels
- ❑ Identify sub activities under each activity/level of activity
- ❑ Specify authorities for each level of activity and sub activity
- ❑ Determine the response time for each activity
- ❑ Workout individual plans of each specified authority to achieve activation as per the response time.
- ❑ Have quick response terms for each specified authority
- ❑ Have alternative plans and contingency measures
- ❑ Provide appropriate administrative and financial delegation to make the response mechanism functional viable
- ❑ Undergo preparedness drills.

**1.3 DISASTERS:**

**Types of Disasters: (Admissible by 13<sup>th</sup> Finance Commission).**

Common Natural Disasters		
❑ Flood	❑ Avalanche	❑ Drought
❑ Cyclone	❑ Fire	❑ Tsunami
❑ Cloudburst	❑ Pest Attack	❑ Hailstorm

### **13. OFF SITE ACTION PLAN FOR THE DISTRICT**

The action plan of District Crisis Group can be broadly divided into three groups viz., pre-disaster planning, during disaster planning & post disaster planning.

#### ***Pre Disaster-Planning:***

- \* To generate awareness among the people about the precautions and remedial measures to be taken during a chemical disaster.
- \* To assess the impact of foreseeable disasters in the district by reviewing the on-site emergency plants of MAH installations
- \* To formulate an “ Off-Site emergency plan”
- \* To conduct mock drills to reduced response time.
- \* To identify the areas where local crisis group formation is needed.

#### ***During disaster planning:***

- \* To continuously monitor any chemical disaster that may strike.
- \* To provide authorised information to press and media.
- \* To combat and contain the disaster
- \* To bring back normalcy.

#### ***Post disaster planning:***

- \* To rehabilitate displace victims
- \* To send information to State/Central Crisis Group.
- \* To assess the short coming noticed during disaster management.
- \* To update the action plan from time to time

#### ***Important Actions required during emergency:***

- \* Informing public for necessary self protection measures.
- \* Evacuation of the affected area
- \* Protection of the affected area
- \* Treatment of victims
- \* Activation combat/ mutual aid/ technical services
- \* Blocking of roads
- \* Maintenance of law and order
- \* Coordination of functioning of various agencies

#### ***Offsite Plan:***

The planning for emergency response required clear cut understanding of the individual responsibilities and due coordination among the responders. The understanding is to be facilitated through interaction and close working for devising and updating plan.

As discussed earlier, there is only hazards of fire, toxic release(Chlorine) and breach of ash dykes. All the factories having fire hazards are self sufficient to combat fire for On-Site and Off-Site Emergencies. There is also mutual aid system among all the 4 Major Accident Hazard units. Besides District Fire brigade will also help them.

#### ***For leakage of Ammonia(NH<sub>3</sub>)***

- Not to be in panic
- To use wet cloth on nose
- To move in the opposite direction of the wind flow

- To remain indoors shutting the doors and windows
- To remain under shower
- Wash the effected portion of the body thoroughly, if in contact
- Drink plenty of water
- Wash the eyes for 15 minutes thoroughly, if in contact
- As NH<sub>3</sub> is lighter than air, it goes up and dissipate into atmosphere. Hence people are to move from top floors to ground floor and lye down
- To remove the casualty to hospital in case of excessive inhalation for treatment and pathological examination

## **CHLORINE:**

### **Properties:**

It is greenish yellow, heavy gas with suffocating odour, extremely strong oxidising agent, non combustible air, but most combustible materials will burn in chlorine as they do in oxygen.

### **Uses:**

Used as bleaching agent, intermittent in manufacturing of plastics, medicines, synthetic rubber, insecticides, herbicides etc. and for purification of water.

### **Nature of hazards:**

- Toxic
- Severe poisoning perhaps fatal when inhaled
- Symptoms may develop after several hours
- Liquid causes severe damage to eyes, skin and air passage
- Contact with moist air produces corrosive fumes
- The gas is heavier than air and spreads along grounds
- Oxidising agent

### **During transportation:**

- Move vehicle to open ground and consult expert immediately
- keep public away
- Keep upwind
- Put on protective equipment

### **Spillage:**

- Prevent liquid entering sewers
- Contain leaking with sand or earth
- Warn population
- Use waterspray to "knock down" vapour
- Do not use water jet on a leak of the tank

### **Fire:**

- Keep containers cool by spraying with water, if exposed to fire
- Do not use water jet directly on leak.

### **First Aid**

- If substance has gone into the eyes, immediately wash out with plenty of water for atleast 15 minutes
- Remove contaminated clothing and wash affected skin with plenty of water
- In case of contact with liquid wash affected part with water, then remove clothes carefully
- Keep patient warm
- Allowed drinks if desired.

### **If inhaled:**

**If patient is conscious:**

Take him to a quiet place and keep him with head and chest elevated, loosen the clothes and keep body warm by wrapping him in blankets. Give tea, coffee, milk. Inform doctor or take the patient to the hospital immediately.

**If unconscious:**

Arrange for patient to be seen by doctor, as quickly as possible. If breathing has stopped or show signs of failing, start artificial respiration.

**Medical Management:**

Absorption : Mainly through inhalation, contact

Pathology : Irritant

**Signs and Symptom****Acute exposure :**

Irritation of eyes, nose and throat may progress, burning pain, chest pain and lacrimation, nausea and vomiting, following harshness of voice, salivation and rhinorrhea appears. Cough, hemoptysis ( urine burn) cyanosis follows Pulmonary oedema may appear.

**Chronic exposure:**

Chronic exposure or concentration of 5 ppm results in bronchial and respiratory disorders

**Chlorine concentration (ppm)****Effects**

0.03-3.5

Range of reported odour thresholds

0.5

Slight odour

1-3

Slight irritation

3-6

Irritation of throat, nose burning of eyes, lacrimation, sneezing, coughing, bleeding of nose or blood tinged sputum

>6

Severe irritation

14-21

Dangerous for 30-60 minutes

35-40

Lethal for 6- to 90 minutes

**Investigations:**

Lung function test:

- Decreased vital capacity, decreased diffusing capacity and increased elastic work of breathing
- Radiographs of chest may show congestion, consolidation and nodulation
- Pulmonary oedema may be seen in severe cases.

**Medical Treatment in Hospital:**

- Irrigate eyes with water
- Rest
- Oxygen with intermittent positive pressure breathing apparatus
- Use of nebulized bronchodilators and decongestants
- Codeine for cough
- Cortisone
- Symptomatic and supportive.

**Progress and Prognosis:**

- Disability usually does not last longer than 12-24 hours in mild cases. However, patient should be kept under medical observation for at least 48 hours as pulmonary oedema may develop

- Respiratory problems may persist in some workers for 12-24 hours.

**Important action required for Off-Site Plan:**

Establish off site control room at an easily accessible and with an efficient and reliable communication system and monitor for

- i. Activating fire fighting services
- ii. Informing public for the necessary self protection measures in the expected affected areas.
- iii. Maintenance of law and order situation
- iv. Evacuation of affected areas for safer places to establish assembly points and arranging for necessary relief measures
- v. Vehicle requisition of requirement
- vi. Activation of mutual aid system and technical services
- vii. If portions of highway is coming in the affected zone, to stop traffic movements from a safer distance.
- viii. Rescue the victims
- ix. To forecast weather conditions on regular basis
- x. To activate and identify medical service, hospital, health care by way of keeping adequate stock of life saving medicines as described in the MSDS and to provide in time medical treatments to the affected persons.
- xi. In case of possibility of water body contamination, public health engineering service to take necessary remedial measure and to warn the public for necessary precautionary measures.
- xii. Regular reporting to Government on day to day basis
- xiii. Releasing authorised statements to press and media services
- xiv. To establish long term clean up measures
- xv. Post emergency activities including award of relief under the Public Liability Insurance Act 1991,

A. ACTION PLAN FOR HANDLING OFF SITE EMERGENCY

B. OFF-SITE EMERGENCY PLAN PREPARATION

C. ROLE OF EMERGENCY OFFICER

D. ELEMENTS OF OFF-SITE DISASTER CONTROL FOR REDUCING INJURY TO PUBLIC

**Role of District Administration:**

- Control all emergency operations
- Guide on matters related to policy issues to all key persons
- Provide official information and instructions to the general public

**Local Administration is to**

- Develop an integrated response strategy based on the available information
- Plan deployment of field units to ensure the availability of appropriate force to deal with the situation.
- Coordinate the functioning of the various agencies
- Monitor the progress till the crisis end and keep the District Administration posted with development.

**Role of District Information & Public Relation Department:**

To organise public awareness programmes for safety procedures to be followed in an industrial disaster through posters, talks, distribution of working leaflets in Oriya & English containing DO's and DON'TS for individual safety and to protect other.

**During crisis :**

- Dissemination of information about the nature of incident
- Inform the public through mass media/ public address system regarding emergency measures to be taken, evacuation plans etc. if required
- Endeavour to keep the local people for not to be panic with the news from the gossip mongers .
- Receive calls from media/ public regarding emergency
- Obtain current information from the control room
- Prepare new release
- Maintain contact with hospital and get information about the casualties

**Role of Police Department:**

**Before Crisis:**

- Have adequate contingency measures for manpower, transport and communication network to co-ordinate possible incident areas.
- Document traffic control measures and for emergency timings
- Identify access and escape route for emergency

**During Crisis:**

- Traffic control
- Warning public about the hazards
- Assist evacuation and ensure protection of property in evacuation area
- Assist fire fighting services
- Assist first aid and medical team
- Control security operations
- Carry out any other assigned duties in the incident area

**After crisis:**

- To protect the evacuated area.
- To assist post disaster rehabilitation programme

**Role of Fire Department:**

**Before crisis:**

- To identify access roads and escape routes at hazard prone areas.
- To identify source of water supply,. Considering the possible hazards planning for the adequacy of water supply, if needed.
- Provision of adequate and proper arrangement of Fire Fighting Vehicles.

**During crisis :**

- Command and control the fire fighting resources in Fire zones.
- Deployment of additional fire sources allocated by control room
- Rescue the victims.

**. Role of Health Department:**

**Before crisis:**

- Arrange for specialised training of doctors of chemical hazards
- Arrange for adequate buffer stock of essential medicine and antidotes
- Identify Ambulance services
- Planning of additional capacity in the base hospital for large scale casualties

- Maintenance of list of blood donors group wise
- Identify First-Aid post, casualty response centre and base hospital

**During crisis :**

- Implement organisational response plan in terms of manpower, transport and equipment

**Role of Transport Department:**

Large number of ambulance and rescue vehicles would be necessary to transport casualties to base hospital and pre evacuation of likely to be affected areas. For this purpose all type of vehicles can be used at short notice.

**Before crisis:**

- Identify source of availability.

**During crisis :**

- Requisition and keep vehicles at the disposal of the Control Room.

**Role of P.H Department:**

In case of water body contamination, large scale cattle deaths, epidemics, loss of flora and fauna can be expected.

**Before crisis:**

- Analyse possibility of water body contamination due to anticipated hazard scenario and plan out remedial measures.

**During Crisis:**

- To effect planned response measures
- To warn all concerned about the danger.

The action plan of all individual departments should be compiled together, so that it is readily available to the District Crisis Group. This document should also contain as annexure:

- i. List of hazardous installations
- ii. Inventory of hazardous chemicals handled/ stored at the hazardous installation
- iii. Copies of MSDS of chemical handled/ stored in the district.
- iv. List of contact persons with contact numbers
- v. Any other information considered as necessary for the purpose.

**RELIEF MEASURES:**

The following assistance will be given to the the beneficiaries in case of loss/damages

#### 14 Review and Rehearsal:

The key officials involved in off-site emergency plan need to be exposed to the actual working scenario for a better understanding of their responsibilities. Periodical mock drill involving the agencies followed by self appraisal meeting will bring out the draw back in the system and would give scope for further improvement. Such periodic drills will refresh the individual responsibilities as well as develop a better co-ordination network. Periodical training of concerned officials on emergency planning and response system will also be taken up for building up an effective emergency response system,. Therefore the following review methods will be taken up.

**Review meeting - Once in three months**

**Mock Drill - Twice in a year (suggested).**
